INTERNATIONAL JOURNAL OF PLASTICITY

Volume 10, Number 1 1994

CONTENTS

George Z. Voyiadjis
Taher M. Abu-Lebdeh 1 Plasticity model for concrete using the bounding surface concept

H. Nigam
G.J. Dvorak
Y.A. Bahei-El-Din 23 An experimental investigation of elastic–plastic behavior of a fibrous boron–aluminum composite: I. Matrix-dominated mode

H. Nigam
G.J. Dvorak
Y.A. Bahei-El-Din 49 An experimental investigation of elastic–plastic behavior of a fibrous boron–aluminum composite: II. Fiber-dominated mode

H. Takahashi
H. Motohashi
M. Tokuda
T. Abe 63 Elastic–plastic finite element polycrystal model

Castrenze Polizzotto
Marianna Zito 81 A step-wise variational approach to elastic–plastic analysis by boundary/interior elements

Volume 10, Number 2 1994

CONTENTS

N. Cristescu 103 A procedure to determine nonassociated constitutive equations for geomaterials

H. Balke
Y. Estrin 133 Micromechanical modelling of shear banding in single crystals

Tasnim Hassan
Stelios Kyriakides 149 Ratcheting of cyclically hardening and softening materials: I. Uniaxial behavior

Tasnim Hassan
Stelios Kyriakides 185 Ratcheting of cyclically hardening and softening materials: II. Multiaxial behavior

---

Volume 10, Number 3 1994

CONTENTS

J.B. Leblond
G. Perrin
P. Suquet 213 Exact results and approximate models for porous viscoplastic solids

Vivek R. Dave
Stuart B. Brown 237 Critical experiments used to determine flow relations for rate-dependent metal deformation

S.M. Arnold
A.F. Saleeb 263 On the thermodynamic framework of generalized coupled thermoelastic–viscoplastic–damage modeling

Shiwei Yang
Colette Rey 279 Shear band post-bifurcation analysis in a planar double slip single crystal model

G. Frantziskonis 303 Research note on the equivalence of isotropic damage mechanics and plasticity

Abdulazeez Abdulraheem
M. Omar Faruque
Musharraf Zaman 309 A two characteristic model for cohesionless soil and its calibration using optimization

---

Volume 10, Number 4 1994

CONTENTS

C.H. Chou
J. Pan
S.C. Tang 327 Nonproportional loading effects on elastic–plastic behavior based on stress resultants for thin plates of strain hardening materials

O.T. Bruhns
U. Rott 347 A viscoplastic model with a smooth transition to describe rate-independent plasticity

J. Kamenjarzh
A. Merzljakov 363 On kinematic method in shakedown theory: I. Duality of extremum problems

J. Kamenjarzh
A. Merzljakov 381 On kinematic method in shakedown theory: II. Modified kinematic method

Gérard A. Maugin 393 Eshelby stress in elastoplasticity and ductile fracture

Guoan Li 409 Effective constitutive behavior of nonlinear solids containing penny-shaped cracks

---

Volume 10, Number 5 1994

CONTENTS

G. Ferron
R. Makkouk
J. Morreale 431 A parametric description of orthotropic plasticity in metal sheets

Triantafilos Markoyannis
Nicolas Charalambakis
H.G. Georgiadis 451 Thermoviscoplastic instabilities and double strain gradient approach in biaxial loading by effective instability analysis

G. Lin
K.S. Havner 471 On the evolution of texture and yield loci in axisymmetric deformation of f.c.c. polycrystals

N. Ramakrishnan
S.N. Atluri 499 On shear band formation: I. Constitutive relationship for a dual yield model

N. Ramakrishnan
H. Okada
S.N. Atluri 521 On shear band formation: II. Simulation using finite element method

J.H. Schmitt
E.L. Shen
J.L. Raphanel 535 A parameter for measuring the magnitude of a change of strain path: Validation and comparison with experiments on low carbon steel

A. Bhattacharyya
G.J. Weng 553 Plasticity of isotropic composites with randomly oriented and packeted inclusions

Yanyao Jiang
Huseyin Sehitoglu 579 Cyclic ratchetting of 1070 steel under multiaxial stress states

Volume 10, Number 6 1994

CONTENTS

Christian Miehe	609	On the representation of Prandtl–Reuss tensors within the framework of multiplicative elastoplasticity
K.S. Chan **N.S. Brodsky** **A.F. Fossum** **S.R. Bodner** **D.E. Munson**	623	Damage-induced nonassociated inelastic flow in rock salt
D. Ceccaldi **F. Yala** **T. Baudin** **R. Penelle** **F. Royer** **M. Arminjon**	643	Deformation textures and plastic anisotropy of steels using the Taylor and nonhomogeneous models
T.G. Nguyen **D. Favier** **M. Suery**	663	Theoretical and experimental study of the isothermal mechanical behaviour of alloys in the semi-solid state
Y.K. Lee	695	A unified framework for compressible plasticity

Volume 10, Number 7 1994

CONTENTS

P. Van Houtte	719	Application of plastic potentials to strain rate sensitive and insensitive anisotropic materials
R.K. Jain **J. Mazumdar**	749	Research note on the elastic-plastic bending of rectangular plates: A new approach
Enrico Radi **Davide Bigoni**	761	Crack propagation in porous hardening metals
N.K. Gupta **A. Meyers**	795	An alternative formulation for interpolating experimental yield surfaces

A.S. Khan
X.M. Su 807 Constitutive relations for single crystal based on two surface description

Mayeul Arminjon
Didier Imbault 825 An analytical micro-macro model for textured polycrystals at large plastic strains

---

Volume 10, Number 8 1994

CONTENTS

Yanyao Jiang
Huseyin Sehitoglu 849 Multiaxial cyclic ratchetting under multiple step loading

K. Hashiguchi 871 On the loading criterion

J.P. Bardet 879 Numerical simulations of the incremental responses of idealized granular materials

M. Boucher
J.P. Cordebois 909 Incremental evolution of induced anisotropy

Salvatore Caddemi 935 Computational aspects of the integration of the von Mises linear hardening constitutive laws

Akhtar S. Khan
Tappan K. Paul 957 A new model for fatigue crack propagation in 4340 steel

I Volume Contents and Author Index
